Outgoing International Bank Wire

Use this form (for non-internationally enabled accounts) to convert U.S. dollars (USD) to a certain currency and bank wire out from your account held with National Financial Services LLC ("NFS") to a foreign financial institution. Additionally, if your transaction is an international wire subject to Part B of the Electronic Funds Transfer Act (a "Remittance Transfer"), refer to the Important Information Regarding Remittance Transfers on this form.

The U.S. dollars will be debited from your brokerage account on trade date and the foreign currency credited to the beneficiary's receiving bank, as indicated below, two business days following trade date. All FX wire transfers are processed via the Society for Worldwide Interbank Financial Telecommunications (SWIFT) system.

Important Information Regarding Remittance Transfers

The end recipient may receive less than the amount requested in Section 2 due to:

- a) the fees shown may be estimates and actual amounts may differ;
- b) there may be additional fees charged by the recipient's bank; and
- c) there may be foreign taxes imposed. The brokerage account owner has the right to cancel this transaction within 30 minutes.

Additionally, we (NFS) reserve the right to determine the routing instructions. In the event the brokerage account owner provides an incorrect bank account number or beneficiary bank identifier, the brokerage account owner will be responsible for the wire amount.
